Differentiation of instructional content and format to meet the needs of all students within the time available to teach each content area.	Deepen understanding of what differentiation is and how it can be accomplished using the resources and curriculum provided.
	Backwards planning of summative assessments and instructional best practices (i.e. Fundamental 5) introduced to align instruction with curriculum and assessments present in the Curriculum Frameworks.	Consistency of instruction that is planned and prepared to: engage students in higher level thinking tasks, be student-centered and inquiry based, and align with curriculum and assessments all within the time allotted for teaching of the content area.	Continue practice of backwards planning to consistently plan and prepare lessons that align with the curriculum and assessments, are student centered and inquiry based, are differentiated, use best practices, and maximize the use of the time allotted to teach the content area without sacrificing teaching of another content.
